SECTION F — OTHER BUDGET INFORMATION

21. Direct Charges	Explained in budget narrative. Contractual line (6f, $7,300,000 Federal) comprises: data/technology service categories, $5,000,000 (exchange & AI infrastructure; in-cab alert network; CV movement analytics; V2X/TIM distribution; fleet telematics/ELD); program-support services, $1,500,000 (program management & multi-state coordination, systems engineering & ARC-IT documentation, procurement support, Federal reporting, outreach delivery — 15.6% of the Federal request); platform integration & operations services, $800,000. Named private-sector providers do not appear in this budget; all services are generic categories procured competitively per 2 CFR 200.319–320, with vendor quotes retained as market-price documentation. Individual consultant compensation subject to the daily rate limitation in the agency's general terms.
22. Indirect Charges	**{Iowa DOT negotiated indirect cost rate agreement: rate, base, and effective date — or de minimis election}**. Draft placeholder $350,000.
23. Remarks	Non-Federal share is 21.9% of total project cost, exceeding the 20% minimum by $232,000. The applicant may, with FHWA approval, substitute equivalent university-partner staff support (Iowa State University Institute for Transportation) and/or partner state DOT staff support for a portion of the state staff in-kind commitment at equal or greater certified value; the total non-Federal share will not be reduced. Partner state contributions certified after submission will be added as voluntary committed cost share. All third-party in-kind contributions are supported by commitment letters stating dollar value, valuation basis (2 CFR 200.306), contribution schedule, and certification of non-Federal funding source. Period of performance: 48 months (36 deployment + 12 operations/evaluation).
